

The Apple Doesn't Fall Far From the Tree!

Learning Positions

above, below, next to, between

Go apple picking by placing apples in different positions. Place the Position Mat in front of you and shuffle the green position cards.

Players take turns drawing a position card. Read the card and then put the apple in that place. If you need, use the Positions Posters to help you put the apple in the right place.

After all cards are drawn, complete the *Cut and Paste* book. Read page of the book to find out where the apple should be glued. Cut and paste the apples in the right position.

Read the book to a friend when you are done!
