

# Animal Habitats

Desert, Farm, Rainforest, Arctic Tundra

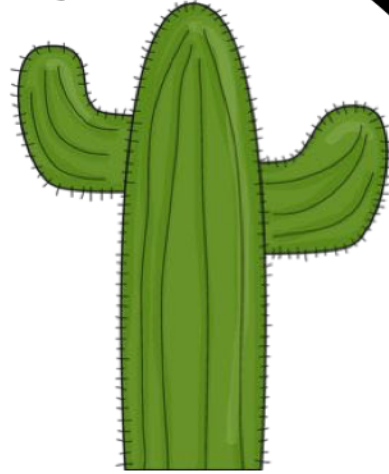

Identify an animal's habitat by sorting the animal picture cards onto the various habitat mats. To play a game with multiple players, deal picture cards to each player. Spin the spinner to land on a habitat. If you have an animal card in your hand that lives in that habitat, discard it on the mat. If you do not have a matching animal, the next player spins. Players take turns until one player has gotten rid of all of their cards. After sorting, draw a picture of an animal that lives in each habitat.
