## Graphing Rocks and Minerals

**Directions:** My uncle and I went rockhounding last summer. We found a bunch of great rocks and minerals. Use the graph to answer questions about how many samples were found. Write your own question for number 5.

1. We found a total of 60 pieces of quartz last summer. How many rocks does each bar equal?
2. How many more agate and garnet were found than obsidian?
3. What percentage of all samples found was quartz?
4. What is the total number of samples found?
5. \_\_\_\_\_
