

Name: _____

Biomes

The world is divided into large natural areas called biomes. Each biome has certain kinds of plants and animals, but also a particular climate. This climate determines the biome's types of plants and animals; its ecosystem. There are animals that can only live in one kind of biome, and not in any other.

Directions: Research the different types of biomes below. Name a country, or state, where this biome is found. Name two animals and two plants that would be found there. Indicate if a plant or animal would be found **ONLY** in that one biome.

Biome	Area of World	Plants	Animals
tundra			
steppe			
savanna			
desert			
tropical rainforest			
taiga			
ice sheet & polar desert
