

Name: _____

Climate

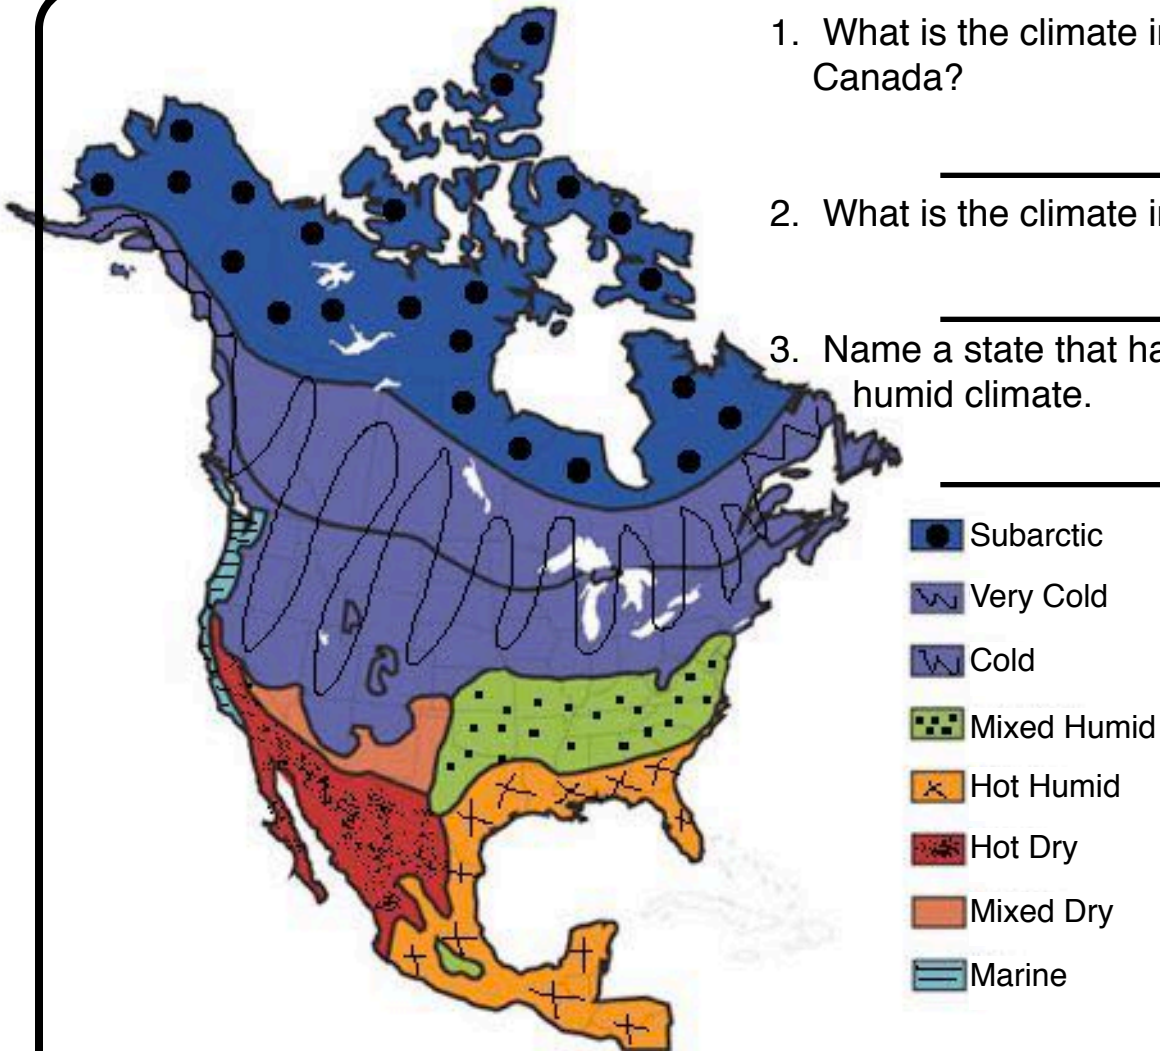

Climate is the average pattern of weather for a particular region taken over about a 30-year period of time.

Directions: Using a map of North America, this climate map, and the map key, determine the climate for each area of North America.

1. What is the climate in Northern Canada?

2. What is the climate in Florida?

3. Name a state that has a mixed humid climate.

4. Name a state that has a climate that is hot dry.

5. What climates exist in Mexico?

6. What type of climate is found in coastal California?
