

Name: _____

Physical Changes in Matter

Physical changes in matter occur when the matter changes the way it looks, without becoming a new kind of matter.

Directions: Circle the examples of items that changed physically.

clay rolled into a
ball

wood that's been
chopped

broken glass

ice melted

fried egg

paper that has
been cut

burned wood

rusted iron

fireworks
exploded

a crushed can

food spoiled

folded clothes

Directions: Give an example where each property of matter has changed.

size

shape

weight
