

Where can I see Circles?

Story By: Andrew Frinkle

Jane was hunting for another shape.
This time she was going after circles.
She had no worries about circles.
They were EASY to find!

She glanced at her paper.
There was a small letter **o**. Hello, circle!
Look has two more circles!
Circles were all over her page.

Then she went to lunch.
Pizzas, cakes, pies, muffins... there were so many circles to choose from.
Don't forget the cookies.
Even the plates were circles, as were the bottoms of cups.

The trash can lid was a circle.
The bus wheels and rims were circles.
The gauges on the dashboard were mostly circles.
A bullseye was a bunch of circles running around each other.
The clock on the wall was a circle.
The basketball court had circles on the floor.
The hoops were circles, also.
Her bracelet was a circle...

Jane thought the easier question was: where aren't there circles?

Where can I see Circles?
