

## Where can I see Other Polygons?

Jane and Robby had found all sorts of shapes before. Their math teacher had given them each a lot of assignments. Now, he gave them their hardest one yet. They had to find 4 other polygons they'd not found yet. Since it was so hard, they got to work as a team this time.

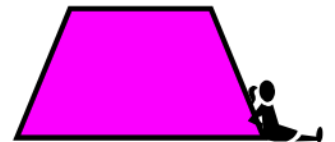

First, they found a parallelogram. It was the pink eraser that Jane had. It looked like a rectangle that was tilted, and both sets of sides were parallel.

Then, they found a few pentagons. Robby found one in home plate on the baseball diamond. Jane found one in the shape of a house she drew. Robby's aunt Gladys had a ring with a pentagon-shaped ruby on it.

Finding a trapezoid was not that easy. They looked at a few houses and found some on the roofs. Trapezoids looked like rectangles with the sides dented in. The top was shorter than the bottom.

Last, they found an octagon. The octagons were all over the streets in the red STOP signs. After they found that one, their job was done.

There were still more polygons out there, though...

## Where can I see Other Polygons?

Use the information in the story to answer the questions below.

1. What is different about this mission?
  - A. They weren't just looking for one shape.
  - B. They only had to find one shape.
  - C. They had to find 3-D shapes instead.
  - D. They had to make their own shapes.
  
2. TRUE OR FALSE: They found a parallelogram first.
  - A. True
  - B. False
  
3. Which of these shapes did Jane and Robby NOT find?
  - A. parallelogram
  - B. trapezoid
  - C. pentagon
  - D. decagon
  
4. Which of these is NOT one of the pentagons they found?
  - A. Aunt Gladys' ring
  - B. home plate
  - C. a picture frame
  - D. drawing of a house
  
5. TRUE OR FALSE: Jane and Robby found EVERY polygon in this mission.
  - A. True
  - B. False

## Where can I see Other Polygons?

Use the information in the story to answer the questions below.

1. What is different about this mission?  
**A. They weren't just looking for one shape.**  
B. They only had to find one shape.  
C. They had to find 3-D shapes instead.  
D. They had to make their own shapes.
2. TRUE OR FALSE: They found a parallelogram first.  
**A. True**  
B. False
3. Which of these shapes did Jane and Robby NOT find?  
A. parallelogram  
B. trapezoid  
C. pentagon  
**D. decagon**
4. Which of these is NOT one of the pentagons they found?  
A. Aunt Gladys' ring  
B. home plate  
**C. a picture frame**  
D. drawing of a house
5. TRUE OR FALSE: Jane and Robby found EVERY polygon in this mission.  
A. True  
**B. False**
