

## Where can I see Ovals?

Robby was hunting for another shape.  
Jane was going after circles.  
He'd been assigned ovals by his teacher.  
That seemed easy enough...

Robby started at home that night.  
He glanced around the house, but saw a lot of circles.  
Where were all the ovals hiding?

Oh, there was one: the dining room table.  
There were also oval patterns carved into the wooden chairs.  
Robby saw the silverware and realized the end of a spoon was an oval.

In the kitchen, he found an egg in the fridge – an oval.  
Large dishes for putting main courses on were usually ovals, too.  
Mom had a baked chicken and vegetables on one tonight!

In the bathroom, he was staring right at one when he walked in.  
The mirror was a big shiny oval.  
So was the toilet bowl, but he didn't want to put THAT on his paper.

He saw his sister combing her hair in her room.  
Her face was sort of an oval.  
So was the head of the brush she used.

Dad was even pushing ovals on the TV remote.  
They weren't all that hard to find after all!

## Where can I see Ovals?

Use the information in the story to answer the questions below.

1. What shape does Robby have to find?
  - A. a semicircle
  - B. a circle
  - C. a crescent
  - D. an oval
