mountain

volcanic
mountain

peak or
summit

dome
mountains

a chain of mountains
that are close together

the highest point of a
mountain

a landform that rises at
least 1,000 feet above
its surrounding area

formed when molten
rock from deep inside
the earth erupts
through the crust and
piles up

a volcanic mountain
where the magma
hardens before erupting
through the surface

mountains that form as
tectonic plates collide
and push up the land,
then are shaped by
weathering and erosion
