

Butterfly Song

Music and Lyrics by: Have Fun Teaching

The first stage of a butterfly is the egg
The second stage is the caterpillar, larva
The third stage is the chrysalis, pupa
The fourth stage is a beautiful butterfly

A butterfly has three main body parts
They have a head, a thorax, and an abdomen
A proboscis that drinks food from a straw
Six legs, four wings, two antenna

Butterflies drink water and nectar
Eating leaves when they're growing as a caterpillar
Spiders, ants, wasps are the predators
Why? Because they like the taste of butterfly

The life span of a butterfly is one month
If it's flying at night it's probably a moth
Butterflies see ultraviolet light
There are Swallowtails, Brushfooted, Skippers and Whites

A butterfly is a cold-blooded insect
They can fly if their temperature is 86
A butterfly has bones on the outside
Exoskeleton of the butterfly
