

Hexagon Song

Music and Lyrics by: Have Fun Teaching

A hexagon is a shape
That has six sides
It is a polygon made up of six connecting lines
A hexagon is a shape
That has six sides
It is a polygon made up of six connecting lines

Draw a hexagon up in the air (2x)
Draw a small, small hexagon up in the air (4x)
Draw a big, big hexagon up in the air (4x)

A hexagon is a shape
That has six sides
It is a polygon made up of six connecting lines
A hexagon is a shape
That has six sides
It is a polygon made up of six connecting lines

Walk in the shape of a hexagon (4x)

A hexagon is a shape
That has six sides
It is a polygon made up of six connecting lines
A hexagon is a shape
That has six sides
It is a polygon made up of six connecting lines
