

Rectangle Song

Music and Lyrics by: Have Fun Teaching

A rectangle is a shape
With four straight sides
It has four right angles
And the opposite sides
Must be parallel and have the exact same size
A rectangle is a shape
With four straight sides

Draw a rectangle up in the air (2x)
Draw a small, small rectangle up in the air (4x)
Draw a big, big rectangle up in the air (4x)

A rectangle is a shape
With four straight sides
It has four right angles
And the opposite sides
Must be parallel and have the exact same size
A rectangle is a shape
With four straight sides

Walk in the shape of a rectangle (4x)

A rectangle is a shape
With four straight sides
It has four right angles
And the opposite sides
Must be parallel and have the exact same size
A rectangle is a shape
With four straight sides
