

Senses Song

Music and Lyrics by: Have Fun Teaching

Touch is the feeling that I feel with my hands
Nerve endings in my skin help my brain to understand
When something is hot, when something is cold
When something is rough, when something is smooth

Touch, Taste, Smell, Sight, Sound

Taste is the flavor that I taste with my mouth
Taste buds on my tongue and on the roof of my mouth
They help me taste what is bitter, taste what is sour
Taste what is salty, taste what is sweet

Touch, Taste, Smell, Sight, Sound

Smell is the scent that I sniff with my nose
I breathe in through my nostrils and smell odor molecules
I like the smell of roses, the smell of clean clothes
I don't like the smell of the stuff between my toes

Touch, Taste, Smell, Sight, Sound

Sight is what I see when I look with my eyes
I see the things on the ground and I see things in the sky
Light rays pass through my pupil to my retina to my brain
The pictures that I see are like a video game

Touch, Taste, Smell, Sight, Sound

Sound is what I hear when I listen with my ears
When an object makes a noise it sends vibrations through the air
Decibels measure the volume of a sound
I hear a whisper that is quiet and an airplane that is loud

Touch, Taste, Smell, Sight, Sound
