

Shape Song

Music and Lyrics by: Have Fun Teaching

Shapes have names, they're made of angles and lines
There are flat shapes and solid shapes
We see them all the time

Now, I will say a shape, I want you to say it too
We'll play the Shape Name Game, that is what we like to do

Circle, Square, Triangle, Rectangle, Oval, Diamond, Heart, Star

Shapes have names, they're made of angles and lines
There are flat shapes and solid shapes
We see them all the time

Now, I will say a shape
I want you to say it too
We'll play the Shape Name Game
That is what we like to do

Rhombus, Trapezoid, Parallelogram, Quadrilateral Polygon, Pentagon, Hexagon,
Octagon

Shapes have names
They're made of angles and lines There are flat shapes and solid shapes
We see them all the time
Now, I will say a shape, I want you to say it too
We'll play the Shape Name Game That is what we like to do

Sphere, Cube, Pyramid, Cone, Cylinder, Triangular Prism, Rectangular Prism

Now we know the shapes, let's do the shape dance
